

Product information

G Data ClientSecurity Enterprise

G Data AntiVirus Enterprise is the high-end virus protection for your corporate network. Central control and automatic protection for any mail servers, file servers, desktops and notebooks protect your company - with minimum expense in terms of administration and costs.

Award-winning technology

- New DoubleScan technology for top virus detection
- Self-learning fingerprinting and whitelisting ensures no loss of PC performance
- The latest methods for detecting unknown viruses (heuristics, cloud security)

G Data ManagementServer

- Installation, scans, updates, settings & reports remotely controlled on the network (LAN/WAN) via TCP/IP
- Remote administration of all PCs / Web interface
- Cascading and disaster protection for server software
- Restoration of older signature statuses (rollback)

G Data AntiVirus Client

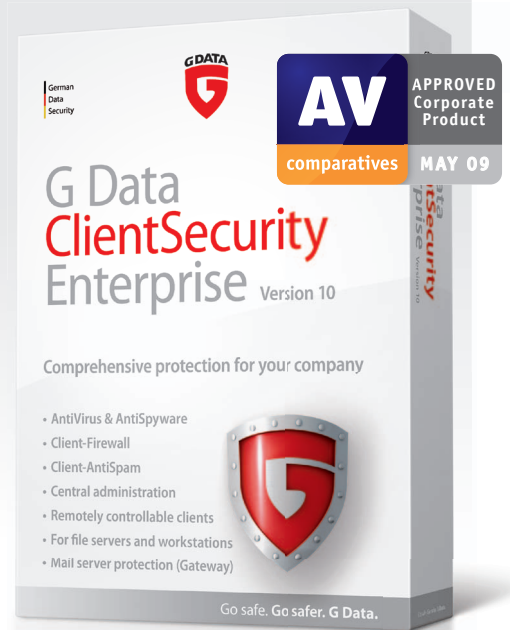

- Client protection runs "invisibly" in the background
- E-mail virus blocker for Outlook, POP3 and IMAP
- Fully integrated Linux clients

G Data Firewall Client

- Remotely controlled installation and configuration
- Maintenance-free thanks to Autopilot-control
- Individual learnable access rules on the client

G Data PremiumSupport

- Hourly virus updates
- New software updates and version upgrades
- Premium support, 24/7, 365 days a year

G Data AntiSpam Client

- Client-side spam OutbreakShield:
- Award-winning real-time spam protection

G Data MailSecurity

- Virus and spam filters as mail-server independent gateway solution (SMTP / POP3)
- For any mail server such as Exchange, Notes etc.
