

eBlaster[®]

Remote Monitoring and Surveillance Software

Keep watch when you can't be around to supervise with detailed reports of their PC and Internet activity. eBlaster records everything they do on the computer and automatically emails you an easy-to-read report hourly, daily or as frequently as you wish. Plus, keep informed real-time with immediate copies of their emails, chats and instant messages.

Key Benefits

- Supervise remote employee PC and Internet activity
- Monitor laptops used outside of the office or school
- Protect children from online predators and inappropriate Internet content while you're away from home
- Monitor parolees, probationers and registered offenders from anywhere

Features at a Glance

- Records everything they do on the PC and Internet
- Forwards a copy of every email, chat and instant message the moment it occurs
- Sends detailed reports of their activity to your email address
- Warns of potential danger when any word or phrase on your watch list is detected
- Blocks any web site or person you don't want them chatting with
- Monitor from anywhere... reports are sent automatically to your email address
- Access and modify eBlaster settings online via any standard web browser

Install and Walk Away

Install eBlaster on the computer you wish to monitor and walk away. It's that simple! eBlaster will immediately go to work by automatically recording EVERYTHING they do online.

eBlaster will automatically record:

-  Emails Sent and Received
-  Chats and Instant Messages
-  Keystrokes Typed
-  Files Uploaded/Downloaded
-  User Activity
-  Web Sites Visited
-  Online Searches
-  MySpace Activity
-  Program Activity and more...

See Their Online Activity

eBlaster recordings are organized into an easy-to-read Activity Report that is automatically sent to any email address you choose as often as you like. Now, no matter if you are at work, in another room, at a

wireless hotspot, on vacation — even if you are thousands of miles away — you can keep watch over their online activity.

Be Notified Real-Time

See inappropriate messages directed at children or sent between employees as they occur. eBlaster Instant Notification keeps you "in-the-know" by automatically and immediately forwarding you an exact copy of every email, chat and instant message.

"The IRS knew about eBlaster and said, 'If you've got that, we can pin him to the wall.'"

He confessed, was fired, and is facing several hundred counts of Federal and state fraud."

Edgar Huite
Jackson Hewitt Franchisee
Foley, Alabama

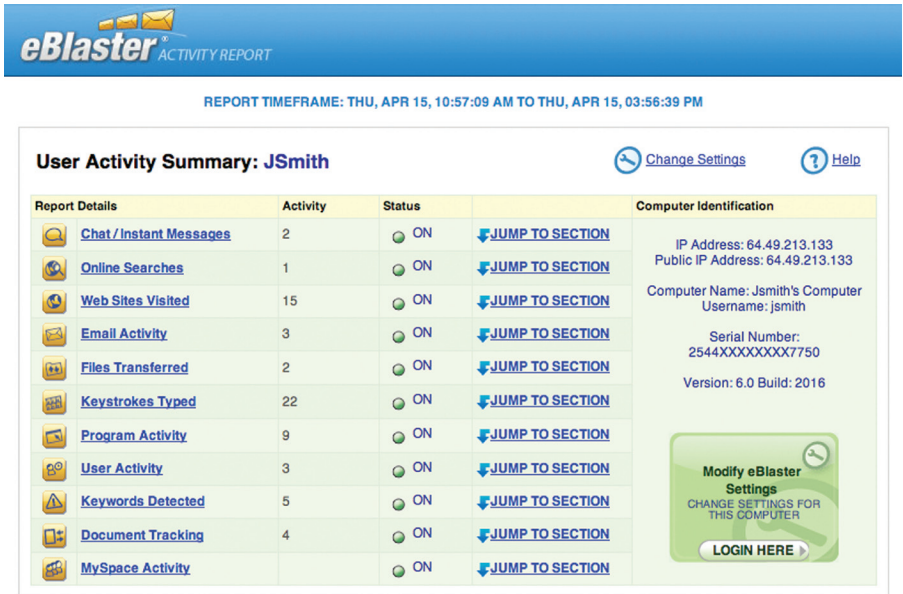

Figure 1. eBlaster Activity Reports are delivered to your email address daily, hourly or as frequently as you choose. A summary (shown above) appears at the top of each report and links to complete details of their PC and Internet activity.

Detect Danger

eBlaster will scan your recordings for sensitive words or phrases and send you an immediate Keyword Alert via email if danger is detected.

Block the Bad Guys

Now that you KNOW which web sites they are visiting, the people they are chatting with and what they are chatting about... how do you handle the bad guys? With eBlaster it's easy — just click BLOCK! eBlaster allows you to quickly block access to web sites you determine to be inappropriate and people you don't want them chatting with.

Access eBlaster Anywhere!

After installing eBlaster, you never have to visit the recorded PC again. An online version of the eBlaster Control Panel allows you to change the email address where reports are sent, alter how frequently Activity Reports are sent, decide what PC and Internet activities are recorded, block additional web sites... and much more.

Plus, eBlaster reports can be sent to any email address you choose including web mail accounts like Google Gmail and Yahoo mail, so you can receive reports while on the go — all you need is Internet access.

Secure & Tamper Proof

Password-Protected Reports

Guard against unauthorized individuals intercepting and reading Activity Reports by choosing eBlaster's password-protected WinZip file format.

Communications Transport Layer Security (TLS)

eBlaster permits secure email transmission over networks using the Communications Transport Layer Security (TLS) protocol.

Stealth Technology

Stealth technology ensures that eBlaster is completely protected from everyone except those with authorized access. eBlaster will not appear in the Windows System Tray, on the Desktop, in the Task Manager or Add/Remove Programs Menu.

System Requirements

For Computer Being Recorded

- All versions of Windows Vista™, Windows® XP Home Edition or Professional (Service Pack 1 or 2) or Windows 2000 (Service Pack 2)

For Receiving eBlaster Activity Reports

- Any computer or device with Internet access.

"Within a few weeks I had compiled enough evidence with eBlaster to discipline an employee for using the Director's computer to chat about objectionable subjects and view websites that had nothing to do with her job."

Amanda Dunn
Director of Information Systems
Twin City Hospital

"eBlaster has enabled our company to comply with SEC regulations without breaking our bottom line. It is a very small client, installs in seconds and is much more cost effective than other solutions."
